A Good Turnout Is Needed At Red Cross Blood Bank

Especially hopeful of a good turnout at the community blood bank tomorrow in Torrance is Mrs. Robert Orsini, blood program chairman for the Torrance-Lomita Red Cross branch.

In her job as volunteer chairman of the blood program for the two communities, Mrs. Orsini is responsible for obtaining support in behalf of visiting bloodmobiles.

To be a complete success, 330 pints of blood must be collected during the 2:30 to 7 p.m. operation of the blood bank, which will be set up at the Elks Lodge No. 1948, 1820 Abalone St.

Mrs. Orsini urges all eligible donors to call now for appointments to participate. Donor scheduling is being handled by her from her home, FA 8-0647. She asks that calls regarding appointments for the bloodmobile be made between 10 a.m. and 3 p.m.

Call for Appointment
The Torrance-Lomita Red Cross branch office, FA 8-0510, may be called for appointments.

"We must continually remind the public of the benefits their blood donations make possible," Mrs. Orsini says.

She points out that uncounted lives have been saved with the help of this program, and thousands more have been helped to a quicker and sometimes less painful recovery.

"We give our blood (those of us who can and wish to), and Red Cross makes it available to any of us — and to members of families — in time of need."

She adds that the blood given and not used directly by the donor, his family or

friends, goes to help save the lives of patients in such places as Childrens, Orthopaedic, and County General hospitals — patients who need blood desperately but have no one to give for them.

Savings in Thousands
Users of blood collected by Red Cross annually are saved thousands of dollars in costs that would have been added to their hospital bills had the blood been procured through commercial sources.

"This is a fine program. It has meant much to all of us whether it has affected us personally or not. However, as is the case with many fine things we have at little or no cost, too many of us tend to take the blood program for granted and to forget that each of us has a responsibility for it."

SCIENTISTS TELL
Scientists can tell by studying the rings of a tree all about the climate weather there was drought or heavy rains, if fires struck the tree any time during its growth. The tree is an accurate historical barometer of a region's climate during its life, and some trees are 4,000 years old.
